MONSOON TR140

pressure	2000 psi
flow	13 lpm
motor	240 volt
pump	Bertolini
power	10 amps
weight	45 kg
L x W x H	65 x 53 x 75 cm
warranty	1 YEAR

SPECIFICATIONS

The Monsoon TR140 Electric Jetter features a 10 amp 240 Volt motor and 13 lpm 2000psi Bertolini pump mounted on a trolley makes the monsoon easy to move around. 2000psi gives great power with a whip hose to punch through stubborn blockages in smaller diameter pipes.

Compact and portable, comes with a lance gun and whip hose adaptor. This unit comes mounted in a full rolled gal chassis that is light but extremely durable.

It has the most power that you can get out of 10 amps / 240 Volts.

APPLICATIONS

The Monsoon TR140 Electric Jetter is ideal for jetting lines in high rise or basements where access is limited or exhaust fumes can cause a problem. Ideal for kitchen lines or floor wastes up to 65mm, as well as high rise storm water lines off balconies. This unit is also a pressure washer which is handy for washing down cars, trucks and machinery. These units can also be found working at marinas where noise can be an issue when cleaning down boats.

MONSOON RANGE

pressure	4-7000 psi
flow	21 - 28 lpm
motor	415 volt
pump	Bertolini
power	15-30 amps
weight	70-82 kg
L x W x H	65 x 53 x 75 cm
warranty	1 YEAR

SPECIFICATIONS

The Monsoon Series are a professional range of 415 Volt cold water high pressure machines made for tough Australian cleaning applications. They feature a 1450 rpm slow speed Bertolini pump and a 4 pole IP56 electric motor from 15-30 amperes. These high pressure water cleaners are designed for long continuous operation. Pressures from 4,300 to 7,000 psi (EWP 12,000 psi with turbo) and flows from 21 to 28 lpm are available.

APPLICATIONS

This unit can be used wherever 415V power is available and where exhaust fumes or sparks are hazardous. This model is extremely popular in the mining sector, as well as large hospitals and commercial high rise buildings. The Monsoon range has as much drain cleaning power as the petrol units so they can easily and quickly clear blockages in drains up to 6" in diameter. These units can also be found working at marinas where noise can be an issue when cleaning down boats.

RACEJET 4000

pressure	4000 psi
flow	13 lpm
engine	Honda
pump	Bertolini
power	13 hp
weight	108 kg
L x W x H	100 x 80 x 80 cm
warranty	3 YEARS

SPECIFICATIONS

The RaceJet 4000 is an entry level petrol jetter designed for plumbers starting out who may not have the budget for a larger machine. We have designed these water jetters with the right nozzle to clear most drains as quickly as possible.

It does not come with a water header tank as the flow rate is the minimum required from a standard hose tap. This is an entry level jetter but has enough power to clear most standard domestic blockages and will run a custom sized root cutter nozzle.

APPLICATIONS

The RaceJet 4000 can be used for all drains from 32mm up to 150mm pipe and can easily be wheeled straight to the problem area without a remote mini reel. It will cut roots with a Root Ranger Nozzle and penetrates deep into root infested drains. It also doubles as an effective pressure cleaner boasting 4000psi. It can be used in sewer and stormwater lines and is an excellent size for contract cleaners as it will operate a path cleaner to its maximum capability. Ideal for difficult access jobs such as high rise apartments due to its mobility and it is light enough to be lifted in and out of utilities, vans or trailers so that it doesn't need to be permanently mounted.

RACEJET 4300

pressure	4300 psi
flow	21.5 lpm
engine	Honda/Vanguard
pump	Bertolini
power	22 hp
weight	130 kg
L x W x H	90 x 60 x 135 cm
warranty	3 YEARS

SPECIFICATIONS

The RaceJet range of water jetters are an extremely popular machine and have been around since the introduction of water jetters in Australia with over 2000 units sold worldwide. It can be found being used by plumbers in most countries in the world today. It has been serving plumbers with reliability and simplicity since 1998. It features a large stainless water tank and removable PVC fuel tank so it can run for hours without stopping. The large heavy duty powder coated reel mounted on top of the jetter comes with 60m 1/4" premium jet hose and will comfortably hold 90m of hose if required. It is mounted on a heavy duty galvanised chassis with pneumatic tyres so it can be removed from your truck and wheeled to remote locations if required. It features a Bertolini Pump and Gearbox with a Honda or Vanguard motor with 3 year warranty.

APPLICATIONS

The RaceJet 4300 is the 'go to' water jetter for all general blocked drains and is capable of clearing 32mm pipes up to 150mm pipes with ease.

This popular unit has the power to clear most stubborn root blockages found in residential and commercial drainage. It takes up a small footprint on a ute or trailer and can be mounted without the reel on the top for access in low clearance car parks when clearing commercial drains and grease lines.

RACEJET 5000

pressure	5000 psi
flow	23.5 lpm
engine	Honda/Vanguard
pump	Bertolini
power	27 hp
weight	130 kg
L x W x H	90 x 60 x 135 cm
warranty	3 YEARS

SPECIFICATIONS

The RaceJet range of water jetters are an extremely popular machine and have been around since the introduction of water jetters in Australia with over 2000 units sold worldwide. It can be found being used by plumbers in most countries in the world today. It has a large water tank and fuel tank so it can run for hours without stopping. The large heavy duty reel mounted on top of the jetter comes with 60m 1/4" premium jet hose and will comfortably hold 90m of hose if required. It's mounted on a heavy duty galvanised chassis with pneumatic tyres so it can be removed from your truck and wheeled to remote locations. It features a Bertolini Pump and Gearbox with a Honda or Vanguard motor with 3 year warranty.

APPLICATIONS

The RaceJet 5000 is slightly more powerful than the RaceJet 4300 and is great for all general blocked drains. The RaceJet 5000 is the 'go to' water jetter for all general blocked drains and is capable of clearing 32mm pipe up to 150mm pipes with ease. This popular unit has the power to clear most stubborn root blockages found in residential and commercial drainage. It takes up a small footprint on a ute or trailer and can be mounted without the reel on the top for access in low clearance car parks when clearing commercial drains and grease lines.

RAMJET 5000

pressure	4300 - 5000 psi
flow	23.5 - 31 lpm
engine	Honda/Vanguard
pump	Bertolini
power	27 - 31 hp
weight	155 kg
L x W x H	155 x 57 x 85 cm
warranty	3 YEARS

SPECIFICATIONS

The RAMJET 5000 is a big, ballsy unit with 5000psi pressure and a huge 23.5 lpm flow rate to clear the most stubborn of drain blockages with ease. It is a strong, compact, fully self-contained unit that will fit snugly onto trucks, utes and vans. It is ready to bolt down and go to work. There is an option to fit a higher flow 31 lpm pump to clear drains up to 225mm. This machine was engineered from the ground up and has a solid frame to hold the large stainless water and fuel tanks. It comes with a water feed hose reel and a high pressure jetting hose reel that can be mounted to the front or back of the machine.

APPLICATIONS

The RAMJET 5000 is ideal for high pressure scrubbing of sewer and stormwater lines from 32mm to 225mm pipe and has the capacity to clear smaller branch lines by attaching a remote Mini Reel and a whip hose. If you are clearing drainage above 150mm the 31 lpm version is recommended for you. This machine will also run a Whirlaway Path Cleaner and a Mustang Venturi Pump.

KEGJET

pressure	5000 psi
flow	23.5 lpm
engine	Vanguard
pump	Bertolini
power	27 hp
weight	140 kg
L x W x H	160 x 60 x 100 cm
warranty	3 YEARS

SPECIFICATIONS

The KegJet 5000 water jetter was designed on a budget featuring a large 60 litre heavy duty 'keg' style water tank and a gal frame chassis. It features 2 large heavy duty hose reels mounted on the jetter frame with 60m 1/4" premium jet hose and 35m of premium water feed hose. It's mounted on a heavy duty galvanised chassis so you can just bolt it down. It features a 23.5 lpm Bertolini Pump and Gearbox with a Honda or Vanguard motor with 3 year warranty. A stainless steel chassis is also available with opposing reel mounts.

APPLICATIONS

The KegJet 5000 Water Jetter is another good all-rounder and is capable of clearing drains from 32mm up to 150mm with ease. It has been adapted as an industrial pressure cleaner and a grit blasting machine for surface preparation. It has been on the market for several years now targeting plumbers who want a 'no fuss' bolt down water jetter for their trucks. The large reservoir tank allows for hours of continuous running.

MULTIJET

pressure	5000 psi
flow	23.5 lpm
engine	Honda/Vanguard
pump	Bertolini
power	27 hp
weight	150 kg
L x W x H	156 x 55 x 100 cm
warranty	3 YEARS

SPECIFICATIONS

The New MultiJet features a full stainless steel 3 piece chassis that can be dismantled and reconfigured anywhere on your vehicle. The jetter can be custom ordered with either a Honda GX690 or a Vanguard 27hp engine. The large 60L heavy duty water tank gives you ample water for high flow pumps and comes with a low water cut out to protect your pump. The MultiJet also features dual hose reels with locks, tensioners and premium feed/jet hose. This design allows the unit to be bolted down to any flat surface and the narrow design takes up less width on your truck. Removable reel mounts so the reels can be mounted directly to the back of your truck or left in place. Without hose reels it measures just 103cm long.

APPLICATIONS

The high pressure, low flow output from the MultiJet is optimum for clearing drains from 90mm up to 150mm lines and laterals. It can also be used in smaller lines down to 32mm with the addition of a whip hose.

The large reservoir tank allows for hours of continuous running. This unit is great for those owners living by the sea due to the corrosion resistant stainless steel chassis.

RACEJET BOSS 5000

pressure	5000 psi
flow	23.5 lpm
engine	Honda
pump	Bertolini
power	27 hp
weight	140 kg
L x W x H	105 x 55 x 107 cm
warranty	3 YEARS

SPECIFICATIONS

The RaceJet BOSS 5000 is the top of the line in the portable water jetter range. It features a full stainless steel chassis, water tank and fuel tank. You can remove the wheels leaving just a chassis to mount to your truck, ute or van. Built by plumbers, for plumbers, it features quality inclusions like anti syphon plates built into the water tank, glass matt battery, racing style filler cap, multi-direction hose reel mounts, dual water and pressure hose reels and a full 3 year warranty. It was designed to take up the smallest amount of room on your vehicle measuring only 55cm wide.

APPLICATIONS

The RaceJet BOSS 5000 has the power to clear all general blocked drains and is capable of clearing 32mm pipe up to 150mm pipes with ease. It is one of the most smallest yet most powerful water jetters on the market today. It can also be removed from the truck and wheeled on site for commercial applications. This machine is purchased by plumbers who appreciate the extra work that goes into a high quality hand made machine.

DUAL JETTER SKID

pressure	4300 psi
flow	31 - 62 lpm
engine	Vanguard x 2
pump	Bertolini x 2
power	2 x 31 hp
weight	dry 450 kg
L x W x H	2.4 x 1.8 x 1.6 m
warranty	3 YEARS

SPECIFICATIONS

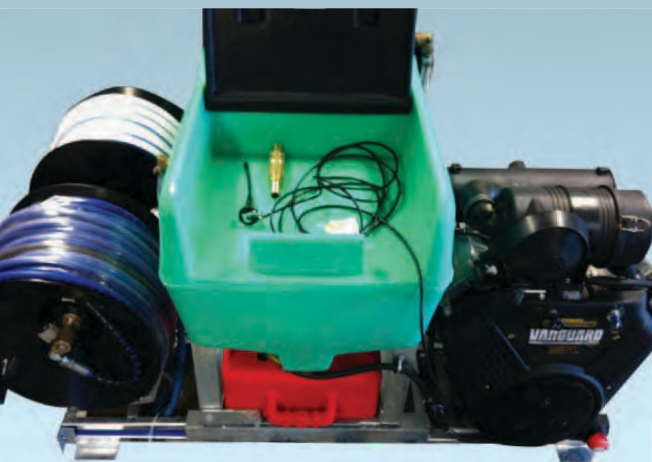

This model is available as a trailer (p16) or on a skid chassis as shown. The Dual 31/31 jetter is powered by twin 31 HP Vanguard engines, each driving a 31 lpm Bertolini pump. These can be run individually through 120 metres of 3/8" high pressure hose at 4300psi/31 litres per minute or together through 120 metres of 1/2" high pressure hose at 4300psi/62 litres per minute.

It comes as a custom built skid or trailer with storage space, heavy duty high pressure hose reels with 4 way roller guides, 120 metres Cobra 1/2" high pressure hose and 120 metres Bluflex 3/8" High Pressure Hose. It features heavy duty Italian made Bertolini Pumps and powerful Vanguard electric start engines, galvanised low pressure feed hose reel with 50 metres of high quality feed hose. 600 litre poly moulded water storage tank with twin Low Water cut-out switches for pump protection.

APPLICATIONS

The main attraction of the dual engine skid is that you can clear lines from 32mm up to 600mm with the one machine. By connecting a remote Mini Reel to the 3/8" reel, all domestic work from 32mm to 150mm can be done using just one engine and pump. Mid-sized lines from 150mm to 225mm can be cleared by using the 3/8" hose with larger flow nozzles. By running both pump/motor groups in tandem through the 1/2" hose, lines up to 600mm can be cleared. With both engines running through the one reel, this unit has enough power to run larger flow nozzles like the WS Warthog and the Mustang Tribine nozzle.

WATER BUFFALO

pressure	4300 psi
flow	31 lpm
engine	Vanguard
pump	Bertolini
power	31 hp
weight	155 kg
L x W x H reels in reels out	130 x 80 x 70 cm 180 x 80 x 70 cm
warranty	3 YEARS

SPECIFICATIONS

The Water Buffalo features a large 31HP 31 LPM pump motor group. It was custom designed for a water authority many years ago and they love them because they can be moved quickly from truck to truck. They have unique pull-out swivel reels that can swivel to face the operator. It is powered by a big Vanguard 31 HP engine with a Bertolini 2:1 Ratio Gearbox. It features a Bertolini 31 lpm Pump – Model Heavy Duty Series RAS 4482 and a compact, heavy duty gal frame with slide out, pivoting reels. It also features a 100 litre UV stable tank with low-water cut-out. Like all of our machines the parts exceed the Australian and NZ High Pressure Standards. Optional “On/Off” Remote Control System.

APPLICATIONS

The Water Buffalo has 50% more power compared to most jetters due to its higher volume of water. It has the ability to clear most blockages in pipes up to 225mm with ease. Many contractors use them for main line sewer cleaning work and larger storm water drainage systems. It is very compact and can be operated via remote control 100m away for safe one man operation. Like the Python Trailer Jetter, this unit is ideal for clearing blockages from sewerage and storm water drains caused by tree roots, sand and silt. Extra flow from the larger pump is suitable for larger diameter pipes. The slide out pivoting reels make the unit a compact fit for a truck, trailer or van and means you can point the reel in the direction of the access point making the hose easier to roll on and off the reel. This jetter can also be used on smaller branch lines from 32mm to 150mm by using a Mustang Remote Mini Reel, Nozzle Box and 1/8” whip hose.

DIY KIT

warranty	3 YEARS
----------	----------------

SPECIFICATIONS

With the DIY (DO-IT-YOUSELF KIT), all the major components are shipped to the buyer to be mounted on a truck, utility or trailer by the buyer. There is a 5000 psi Pump/Motor group featuring a Honda GX690 engine and a Bertolini Pump, a custom made Double Stacker Reel with high quality jetting hose and water tank feed hose. The kit comes with a 35 litre water tank fitted with float valve, by-pass return fitting and a low water cut-out switch, as well as a UV stable 12 litre fuel tank. All the purchaser has to do is mount the engine, reel-stand and tanks. Please note: There is a high pressure hose that will need to be custom made by a Hydraulic Shop that supplies water from the pump to the reel is not included with the kit, as well as small lengths of tank return hose and fuel hose that can be purchased from the same shop. Save money by DIY!

APPLICATIONS

As with other 5000 psi units, this unit is ideal for the domestic plumber clearing chokes in 32mm up to 150mm drains. This kit allows the owner/operator to set up their equipment the way that they want to with the configurations only limited by imagination. This unit has the power and flow to clear 99% of blockages that you come across.

APACHE TRAILERJET

pressure	4000 - 5000 psi
flow	24 - 31 lpm
engine	Vanguard
pump	Bertolini
power	27 - 31 hp
weight	230 kg
L x W x H	2.5 x 1.3 x 1.3 m
warranty	3 YEARS

SPECIFICATIONS

This is one of the smallest trailer jetters that can be towed by a small car due to its heavy duty frame but intelligent weight saving design. It won't take up much room in your garage and the draw bar folds away so it can be freighted on a skid to save delivery costs. It comes on a generic hot dipped Gal chassis with new gal wheels and tyres. Heavy duty 27hp V twin Vanguard Motor with Italian made 24 lpm Bertolini pump. This trailer neatly stores both hose reels on the back for easy access. There is also a mount on the draw bar for the remote mini reel padlocked down for security.

APPLICATIONS

This small but tough little trailer is powerful enough to clear most blockages with its big 24 lpm pump or optional 31 lpm pump. It will clear drains up to 225mm and when used in conjunction with a remote mini reel it's unstoppable for most drain clearing operations. They are popular for plumbers who can't fit a jetter in their vehicle and due to their size they store extremely well in your work shop.

PYTHON TRAILERJET

pressure	4300 psi
flow	31 lpm
engine	Vanguard
pump	Bertolini
power	31 hp
weight	380 kg
L x W x H	3.5 x 1.8 x 1.4 m
warranty	3 YEARS

SPECIFICATIONS

This jetter has been mounted in a heavy duty 7' x 4' galvanised trailer with a large 31 lpm pump/motor group. The 200 Litre poly moulded water tank is mounted up off the floor so it flows directly into the pump with a low water cut out. The dual hose reels are raised up on the back of the trailer so you don't have to lean down to roll up the hoses giving you a large capacity storage area underneath for shovels, bars, cameras and equipment. It comes with 3 new white steel wheels and tyres ready for registration.

APPLICATIONS

Ideal for clearing blockages in sewerage and stormwater drains caused by tree roots, sand and silt. This unique trailer jetter has been designed to clear pipes from 150mm up to 450mm using the extra flow through the larger nozzles. Used by Plumbers for drain cleaning and mine sites for cleaning down their large equipment.

This jetter can also be used on smaller branch lines from 32mm up to 150mm by using a Mustang Remote Mini Reel, Nozzle Box and 1/8" whip hose.

DUAL JETTER TRAILER

warranty 3 YEARS

SPECIFICATIONS

This model is available as a trailer as shown or on a skid chassis (p11). The Dual 31/31 jetter is powered by twin 31 HP Vanguard engines, each driving a 31 lpm Bertolini pump. These can be run individually through 120 metres of 3/8" high pressure hose at 4300psi/31 litres per minute or together through 120 metres of 1/2" high pressure hose at 4300psi and 62 litres per minute. Available in single axle and dual axle (as shown). It comes as a custom built skid or braked trailer with storage space, heavy duty high pressure hose reels with 4 way roller guides and 120 metres Cobra 1/2" high pressure hose. 120 metres Bluflex 3/8" High Pressure Hose. It features heavy duty Italian made Bertolini Pumps and powerful Vanguard electric start engines. Galvanised low pressure feed hose reel with 50 metres of high quality feed hose. 600 litre poly moulded water storage tank with twin Low Water cut-out switches for pump protection.

APPLICATIONS

The main attraction of the dual engine skid is that you can clear lines from 32mm up to 600mm with the one machine. By connecting a remote Mini Reel to the 3/8" reel, all domestic work from 32mm to 150mm can be done using just one engine and pump. Mid-sized lines from 150mm to 225mm can be cleared by using the 3/8" hose with larger flow nozzles. By running both pump/motor groups in tandem through the 1/2" hose, lines up to 600mm can be cleared. With both engines running through the one reel, this unit has enough power to run larger flow nozzles like the WS Warthog and the Mustang Tribine nozzle.

STEAMJET TRAILER

pressure	4000 psi
flow	15 lpm
engine	Vanguard
pump	Bertolini
power	18 hp
weight	420 kg
L x W x H	3.2 x 1.7x 1.6 m
boiler	Diesel
warranty	3 YEARS

SPECIFICATIONS

The SteamJet Contractors Trailer Jetter was designed by a cleaning contractor/plumber who wanted a large lockable storage box, a gutsy steamer/jetter that does not require a separate power supply, both jetting and pressure cleaning reels, drain cleaning nozzles, water inlet feed hose reel, 5m extension wand, large whirlaway path cleaner, petrol blower and spare lances all on a trailer to tow behind a small car or ute.

It's an awesome design and every owner has been very proud of their investment.

APPLICATIONS

This jetter/pressure washer configuration is multi purpose. Two operators can be cleaning at once. It can be used to clear drains, gutters, roofs, paths, graffiti, walls etc. Flick a switch and you have variable hot water on demand for clearing grease chokes, chewing gum and killing moss from footpaths and driveways. Its neat compact design means it can be stored easily and taken into low clearance car parks for commercial drain cleaning or pressure washing applications.
